# Mikael Engvall

Fullstack developer

Mikael Engvall is a well appreciated and versatile IT consultant with a rich background in technology and human-centric roles. His journey in tech began with early programming experiences and later evolved with Full Stack Development in Java, showcasing a strong technical foundation.

With passion for system development and programming, Mikael has a hands-on approach to problem-solving and agile deliveries. His earlier experiences as a math teacher and lifestyle coach have honed his organizational skills, empathy, and ability to connect with diverse groups, underscoring his strong personal and social skills. Furthermore, his multinational background and fluency in multiple languages add a unique dimension to his profile, promising a well-rounded addition to any team looking for technical prowess infused with genuine motivation and authenticity.

## Reference

*"In a just a few weeks Mikael and a colleague developed a full-stack web solution in Java, demonstrating deep technical competence, customers need awareness, and performance through all project phases. The solution enabled advanced AI technology through a well-balanced and appreciated user interface. I would engage Mikael for our next development project any day."*

Mikael Fredman, CEO  
Swedish Consulting Group
